Special Request Information

1. Background: Review and discuss the context of the proposed technology in detail. Explain how this proposal will be used in conjunction with an original proposal or existing technology. If applicable, how is the current technology disabled or inadequate?

We are making an urgent request for 2 charging stations for the UWY Study Spaces. We did not make a request for these items last year, but we've recently learned that UW Tacoma will be adding 25 Study Spaces for immediate student use. Each charging station will come with 8 cables (3 apple, 3 micro usb, 2 type c). Each station comes with custom UW Tacoma graphic design, lifetime warranty, and security cable.

2. Benefit to Students: Discuss how students have benefited from the original proposal, if applicable. How will additional funding of the technology benefit students? If this was an unforeseen technology need, discuss how students will benefit from this new proposal and why the need cannot wait for annual allocation funding.

Almost everyone has a phone nowadays and batteries runs out quickly. These stations will allow students to charge their phones while studying. Spaces are being added at the UWY is because many of our students have stated they don't have good study spaces at home (e.g. large families, limited network) or where they currently live (e.g. a shared small living space nearby).

3. Access: Describe who will be using or will have access to the resources being proposed. If the access has changed since an original proposal, be sure to note that here. In addition, all previous requestors, please provide historic data highlighting the usage and accessibility of technology. All new requestors, please provide user need data.

UW Students, but because they would be in an open area, faculty, staff and guests will have access to them.

4. Timeline: Provide a timeline showing how the proposed technology can be completed during the requested period. Describe when you would like to see this proposal initiated and completed, and why.

Information Technology will order and install the charging stations as soon as they arrive.

5. Resources/Budget: Discuss available financial, personnel and space resources devoted to the proposed technology and level of support. Proposal must detail all the items/resources requested to be purchased. This includes filling out the Item Detail in next section.

Information Technology will install the charging stations and security cables
