

Annual Request Information

1. Background: Review and discuss the context of the proposed technology in detail. Explain how this proposal will be used in conjunction with an original proposal or existing technology. If applicable, how is the current technology disabled or inadequate?

We are requesting for digital still cameras, video cameras, microphone kits, audio recorders, projectors, microphones, and accessory items (chargers, bags, lens caps, etc.)

We are requesting the digital still cameras, video cameras, microphone kits, audio recorders, and projectors to replace and add on to the current inventory. In our current inventory, some of these items are over 5 years old and are getting out of date and/or breaking down. Also, in this last year, we have had an increase in faculty assigned production projects. This includes video documentaries, photo essays, research projects and live event needs. This equipment will give students the equipment and opportunity to do those projects without having to pay for it out of pocket.

We are requesting for microphones because we currently only have 2 separate microphones in our inventory and the demand is currently higher. We would like to check out to students that need it.

Accessory items include batteries, battery chargers, lens caps, body caps, SD cards, and various USB/AV cables. These items tend to break easier, get lost or just stop working. We are requesting these to replace the ones that have been broken/lost and have some extra ones to replace more if needed.

Urgent Items:

- 1. Microphone Kits
- 2. Audio Recorders
- 3. Microphones
- 4. Data Projectors
- 5. Replacement Items (chargers, bags, lens caps, etc)

Replacement Items due to age:

- 1. Digital Cameras
- 2. Digital Video Cameras
- 2. Benefit to Students: Discuss how students have benefited from the original proposal, if applicable. How will additional funding of the technology benefit students? If this was an unforeseen technology need, discuss how students will benefit from this new proposal and why the need cannot wait for annual allocation funding.

Our main goal for media equipment is to ensure that there will always be cameras and other media equipment available for students to checkout. The demand for camera, speakers and other media equipment is high, and we would like to continue that service for students. For example, there were over 900 media items checked out these last two years. By providing students with new equipment, they will always have dependable and easy to use cameras, projectors, and other media equipment.

3. Access: Describe who will be using or will have access to the resources being proposed. If the access has changed since an original proposal, be sure to note that here. In addition, all previous requestors, please provide historic data highlighting the usage and accessibility of technology. All new requestors, please provide user need data.

Only registered University of Washington Tacoma students will be allowed to check out the media equipment for a week at a time. The schedule that students can stop by and check out the equipment is:

WG 108 Lab/Helpdesk

Currently: Monday-Thursday 8:00 AM to 7:30 PM, Friday—8:00 AM to 5:00 PM, Saturday & Sunday-CLOSED

4. Timeline: Provide a timeline showing how the proposed technology can be completed during the requested period. Describe when you would like to see this proposal initiated and completed, and why.

Installation will be completed during summer quarter of 2021. All installation will be providing by Media Services at no charge.

5. Resources/Budget: Discuss available financial, personnel and space resources devoted to the proposed technology and level of support. Proposal must detail all the items/resources requested to be purchased. This includes filling out the Item Detail in next section.

Media Services will install and maintain the items requested. No additional procedures will need to be implemented for the equipment.
