Total Locations		76	75	7	75	58	70	47	75	53

Note 1: Conference Rooms, breakout rooms, small meeting rooms are not included in the list above

Note 2: SCI teaching labs (SCI 211, 217, 311 and 317) and Theatre/ Broadcast Studio (CP-007) **can reserve portable PA systems from Media Services**

Note 3: New Engineeing labs under construction in Academic ground floor are fully equipped with AV

Note 4: New CEI Training Room - SNO 150B - included (although only scheduled by CEI)

Note 5: WPH MAR/JTR included

TOUCH PANEL MEDIA CONTROLS
Most of our classrooms utilize touch screen, control panels to power up the power up the projector, adjust volume, change inputs between PC, laptops, document cameras, wireless devices and control the point-tilt-zoom (PTZ) video cameras.

WIRELESS LAPEL MICROPHONE
All of our instructional spaces have wireless microphones and bodypacks. These can be used for in-class voice amplification through the speakers. Most have also been rewired in the system to be selectable audio options in Panopto and Zoom. This is the clearest instructional audio recording available.

Ceiling Array Microphones
A select few classrooms have been modified with a ceiling microphone that has eight separate mics built-in.
These separate mics have been pre-programmed and directionally set to pick up the front of the room, as well as the classroom participants. The ceiling mics are also configured to feed into Panopto or Zoom.
These locations are ideal if it is important to get class discussions into lecture capture or distance learning sessions.

Webcams
Webcams are installed at the instructor's desk in all of our classrooms. Both the camera and the microphone can be used for Panopto and Zoom.

Pan-Tilt-Zoom PTZ Cameras
HD cameras are mounted towards the back of the classroom. They can be controlled from the touch panel screen

with preset positions or directional buttons. PTZ cameras are configured for Panopto and Zoom.

Document Cameras
HD doc cams are at most instructor stations in our classrooms. To get them onto the projector screen, you must select DOC CAM on the touch panel inputs. They are wired to be selectable in Panopto and Zoom.

Wirelessly Connect your Personal Device to Screen
Many rooms now have an Airserver that supports Android, Mac, Google and Microsoft devices. You can put your image and video on the screen. Airservers are also wired to feed into Panopto and Zoom. To use, you must select, "wireless" on the touchpanel.

Remote Control of Touch Panel through Web Link
To use the remote control interface on your phone, tablet or laptop, you must contact tacmedia@uw.edu to receive a specifid web URL for that room's control panel.
