Biomedical Science BS
Examines life sciences including cell biology, microbiology, molecular biology, genetics, biochemistry and physiology. Prepares you for training and employment in healthcare- and biology-related fields.

Healthcare Leadership BA
Explores health care issues, social marketing, information management, budgeting and diversity to promote health. Provides preparation for leadership roles in a variety of organizations.

Nursing BSN
Provides an efficient path for Registered Nurses (RN) to the Bachelor of Science in Nursing (RN to BSN) degree. Emphasizes communication, critical thinking, cultural sensitivity, policy, health promotion and quality management. You must be a RN licensed in Washington before starting this program.

Psychology BA
Examines the psychological, biological, and contextual determinants of human behavior through different forms of knowledge [e.g., evidence-based (quantitative/qualitative), interpretive (existential), & expressive (play, creative arts)].

Criminal Justice BA
Offers a multidisciplinary understanding of crime and justice from a social justice perspective, preparing you for careers in criminal justice or pursuing graduate or law school study. ONLINE OPTION available.

Social Welfare BA
Prepares competent, ethical and culturally-responsive social workers committed to social justice and evidence-based practice with an emphasis on poor and underserved populations.

Sustainable Urban Development BA
Studies the global movement for significant “greening” of urban development through environmental quality, economic prosperity and social equality.

Urban Studies BA
Studies cities and how they function, how people interact, the role of government, and how growth and development are planned. With four options: Community Development & Planning, GIS & Spatial Planning and Global Urbanism.

Urban Design BS
Urban design is the art and science of creating and improving livability in our cities. Uses community engagement and digital skills to produce design solutions.
