# Tentative Class Schedule

Any changes will be announced in class, via email, and on Canvas.

<table>
<thead>
<tr>
<th>Week</th>
<th>Lecture Topics and Exercises</th>
</tr>
</thead>
</table>
| 1 Th 9/29 | Introduction to course and “flipped” model, Canvas Orientation, Syllabus Activity  
Pre/Post Surveys  
Scientific Method Exercise |
| 2 T 10/4 | Concept Check on recorded lecture  
How to earn full credit on short-answer questions  
Graphs and Uncertainty participation worksheet  
Graphs and Uncertainty In-Class Assignment  
Questions about PSA assignment?  
See links on Canvas |
| Th | **We will meet in the science building, room 109**  
**DO NOT GO TO OUR NORMAL CLASSROOM TODAY**  
UWT Media Staff  
Discussion: Rubric for storyboard and PSA video  
Making graphs in Excel (we will complete this in SCI 109) |
| 3 T 10/11 | Concept Check on recorded lecture  
Finding scholarly articles using the UWT library website  
Ecosystems and Nutrients (Part 1) participation worksheet  
Ecosystems and Nutrients In-Class Assignment  
Global Honors last 10 min of class |
| Th | **Quiz 1 (includes concept check for Eco & Nutrients P.2)**  
Ecosystems and Nutrients (Part 2) participation worksheet  
In-class Video: “Poisoned Waters” (0:00-12:00 & 23:00-41:36) |
| 4 T 10/18 | **Field Trip #1 Central Wastewater Treatment Plant** |
| Th | Concept check on recorded lecture  
Pollution participation worksheet  
Pollution In-Class Assignment  
CSE Format Exercise  
Game plan for research project (how to write a field report) |
| 5 T 10/25 | **Research Project: Sampling for plastics at Thea’s Beach** |
| Th | **Lab Work: Quantify plastics, Compile data from both beaches, How to write a results and conclusions section**  
**Work on Lab Report in SCI 211** |

Tasks/Due Dates

1. Complete TOSLS and TOSRA Surveys BEFORE class  
2. Watch “Experimental Design and Data” recorded lecture BEFORE class  
3. Submit your rubrics on Canvas and bring a copy to class

Watch “Ecosystems and Nutrients (Part 1)” recorded lecture BEFORE class  
Watch “Ecosystems and Nutrients (Part 2)” recorded lecture BEFORE class  
Dress appropriately and bring a notebook and pencil  
Watch “Pollution” recorded lecture BEFORE class  
Pre-Research Assignment Due at beginning of class  
Bring a pencil, camera, and a notebook  
Bring a laptop if you have one  
Field Report Due at beginning of class
<table>
<thead>
<tr>
<th>Date</th>
<th>Activity</th>
</tr>
</thead>
</table>
| 6 T 11/1 | Critique of beach plastics experiment  
Review for Exam 1  
Use rubrics to grade PSA from youtube  
**In-class Video:** Finish “Poisoned Waters” *(41:36-123:22)*  
Lab Report Due at beginning of class |
| 7 T 11/8 | Storyboards and comments from peers  
**Exam 1**  
Bring your storyboard to class |
| 8 T 11/15 | Concept check on recorded lecture  
Stormwater (Part 1) participation worksheet  
Stormwater (Part 1) In-Class Assignment  
Time with your PSA group members  
Watch “Stormwater (Part 1)” recorded lecture BEFORE class |
| 9 T 11/22 | NO CLASS – THANKSGIVING Holiday |
| 10 T 11/29 | Concept check on recorded lecture  
Habitat Alterations (Part 1) participation worksheet  
Habitat Alterations (Part 1) In-Class Assignment  
Watch “Habitat Alterations (Part 1)” recorded lecture BEFORE class |
| 11 T 12/6 | View all PSAs in class (Meet in SCI 109)  
Group discussion on Authentic Research Experience Course Evaluations  
Submit your PSA on Canvas (1 submission per group)  
You will need to access your PSA so we can view it in class  
Practice final exam  
Q & A Review for Comprehensive Final  
Complete TOSRA and TOSLS post-surveys BEFORE class |
| 12 | **TUESDAY December 13 - Comprehensive Final**  
Normal time and location |
TCORE 102

Where the water meets the road: Examining the environmental impacts of urbanization on aquatic ecosystems

Science Librarians: Katie Monks

COURSE DESCRIPTION
How do our actions impact aquatic organisms living in the Puget Sound region? The human population is currently growing at a rapid rate, and a greater proportion of that population is choosing to live in urban areas. This, in turn, magnifies the stresses imposed on aquatic organisms in adjacent water bodies. Lectures will focus on these issues as well as some exciting sustainable development practices occurring in our region. To gain a global perspective, you and your peers will explore relevant issues that are currently occurring in urban centers outside the United States.

CORE
The Core program consists of a coordinated series of courses that represent the various disciplines in the university. This course, along with the others in your cohort, fulfills one of the university’s general education requirements in each of the areas of knowledge plus composition. The courses are designed to both support and challenge you to develop the critical thinking, writing, research, and analytical skills you’ll need at UWT while introducing you to relevant topics in the social sciences, humanities, and sciences.

STUDENT LEARNING OBJECTIVES

ABILITY TO APPLY THE PROCESS OF SCIENCE
- Understand science is evidence based and grounded in the formal practices of observation, experimentation, and hypothesis testing
- Understand and apply basic principles in experimental design
- Identify problem-specific methodologies
- Gain hands-on experience collecting data to draw conclusions
  - Observations and procedures—importance of documentation
- Evaluate scientific information and the methods used to generate the information

ABILITY TO USE QUANTITATIVE REASONING
- Understand that mathematics underpins science
- Generate and interpret tables and graphs
ABILITY TO UNDERSTAND THE RELATIONSHIP BETWEEN SCIENCE, MATH AND SOCIETY

- Understand science/math as a human endeavor in which all people can participate
- Understand how societal issues influence the direction of science and math
- Understand how science and math influence our everyday lives
- Build a sense of civic responsibility

COMMUNICATION/SELF EXPRESSION

- Formulate an original thesis-driven argument and sustain it in both written and verbal communication.
- Express ideas clearly in writing and speaking in order to synthesize and evaluate information before presenting it.
- Identify, analyze, and summarize/represent the key elements of a text.

GLOBAL PERSPECTIVE

- Think outside of cultural norms and values, including their own perspectives, to critically engage the larger world.

COURSE SITE

We will use Canvas (https://uw.instructure.com) as our online course management system. Your instructor will post PowerPoint slides (as a .pdf), recorded lectures, readings, assignment descriptions and drop boxes, helpful links, etc. to the course site. In many instances, you will be asked to submit assignments for grading through our Canvas site. Click on the help link in Canvas if you need assistance.

TEXTBOOK

This class does not have a required textbook. All required readings are posted on Canvas.

COURSE REQUIREMENTS

Lectures – using a flipped design

We are using a “flipped” model in this class. What this means is that you will watch a recorded lecture before class and work on participation worksheet and In-Class Assignments during class. Participation worksheets include open-ended questions that are designed to encourage discussion and debate among you and your group members. You will also have the opportunity to get immediate help with assignments since most of them will be completed in class. This is not usually an option in classes that follow the more traditional lecture model (i.e., more assignments completed as “homework”). I strongly encourage you to bring your notes, and a laptop and earbuds to class in case you need to re-watch part of the recorded lecture (You can borrow a laptop from WG 108) while completing in-class assignments. Having 24/7 access to recorded lectures allows you to re-watch portions of lectures (or entire lectures), makes note taking much easier since you can pause the recording at any time, and allows you to watch lectures at your own pace (i.e., watch 20 minutes now and 15 minutes after work).

FAQ: “I am watching a lecture at home AND coming to class. Doesn’t that double my work load?”

No - You will not be asked to do as much homework since you will be completing many of those assignments during class. In addition, recorded lectures will be much shorter than our class period.

Concept Checks

The flipped model only works if you watch the recorded lecture before coming to class on that date. To encourage adequate preparation, we will begin class with a Concept Check related to the content covered in the respective recorded lecture. A Concept Check (CC) is a brief assessment (~ 5 questions) that is based on the recorded lecture that you were assigned. Be aware that I will not answer lecture content questions in class before the CC. Do you have questions about the lecture content that you would like
answered before taking the CC? If so, you should stop by my office before class or send me an email with your questions at least 12 hours before the CC. Students cannot make up a missed CC, even if you arrive shortly after the class finished it; however, I will drop your lowest CC score (a zero in this case).

Assignments
Read each assignment description (excluding in-class assignments) well before the due date and ask your instructor for clarification if needed. Assignments are to be completed individually, unless otherwise stated. Your instructor may not be able to access certain formats on Canvas, thus electronic submissions must be .doc, .docx, or .pdf. Graded assignments cannot be redone for a grade increase. Review the first two pages of this document for due dates/times.

Did you know that you and other UW students can get a **FREE subscription to Microsoft Office 365**? Visit [https://www.washington.edu/itconnect/wares/uware/microsoft/microsoft-office-365-proplus/](https://www.washington.edu/itconnect/wares/uware/microsoft/microsoft-office-365-proplus/)

Pre/Post Surveys
You will complete three assignments at the beginning (pre-) and end (post-) of the quarter. These assignments will be used to help science faculty assess:
- how this class impacts your science-related assumptions (TOSRA)
- how this class impacts your scientific literacy skills (TOSLS)

Exams and Quiz
The exams and quiz will cover lectures, field trips/field work, and in-class assignments. I expect your answers to include as much detail as was provided in those lectures. Each exam/quiz may include multiple choice, matching, fill-in-the-blank and short answer/essay questions. See the first three pages of the syllabus for exam/quiz dates and content. It is expected that you spend at least two hours studying per one hour of class in preparation for exams. We have four hours and ten minutes of class each week, which means that you should plan to study at least eight hours and twenty minutes each week.

Use the restroom before class, especially on exam/quiz days. If you have to leave during an exam or quiz, you will need to turn in your work without the opportunity to finish upon return. The use of electronic devices is strictly prohibited during exams without DSS documentation. **There will be no make-up quizzes or exams.** If you are absent on any of the quiz or exam dates due to sickness or other verifiable grave circumstances, the weight of your final exam will be increased proportionately. **You must notify your instructor before the quiz or exam starts to be eligible for this option.**

Those with an overall grade \( \geq 90\% \) on the last day of lecture may opt to skip the final exam, unless you missed a quiz or exam. If you chose to do so, then the grade on that date will be the grade that you earn for the final exam.

Authentic Research Experience
As an introduction to science course, it is critical for you to experience the scientific process rather than just hearing about it. We will conduct an experiment that looks at the quantity of mega-, macro- and microplastics at two different beaches in Tacoma. A detailed description of this assignment can be found on Canvas.

Public Service Announcement
You and one or two of your peers will create a Public Service Announcement (PSA) that highlights an environmental concern in a city outside the United States. You get to choose the location and environmental issue! The only major criterion is that the environmental issue poses a direct threat to the health of aquatic ecosystems in/near that city. UWT staff will help you learn how to film and edit your video, so no technical knowledge is required (see [http://www.tacoma.uw.edu/information-technology/multimedia-and-video-production](http://www.tacoma.uw.edu/information-technology/multimedia-and-video-production)).

A detailed description of the PSA assignment can be found on Canvas.
**Group Work**

Group work is to be equally distributed among the members of your group. Please inform your instructor if a group member is not doing his/her share of the work and you have tried unsuccessfully to resolve the issue. You are still responsible for turning in a complete PSA even if one or more of your group members drops the class or fails to participate. Those who do not contribute will receive a score of zero for that assignment.

**Late Work**

Deadlines, unless otherwise stated, are at the beginning of class on the due date. If you turn in the assigned material after class starts, it will be considered late. Any late assignment will receive a deduction of 10% for each 24-hour period that it is late. The assignment will not be graded after the fifth day.

**Field Trips/Field Work**

Field trips and field work (our research project) provide an opportunity for you to connect lecture topics with ‘real-world’ issues through experiential learning. Please show up on time and come prepared (warm clothes, NO OPEN TOED SHOES OR SANDALS, rain gear, pencil, paper, know what we are doing, etc.). Those who are not prepared may lose the opportunity to attend the field trip/field work. You will be tested on information presented during these activities, so make sure to take good notes.

**Participation**

Students are expected to be prepared for class, ask/answer questions, contribute to discussions and in-class group work, etc. You cannot make up missed participation worksheets. Refer to the participation rubric posted on Canvas for a more detailed description of how this will be assessed.

**Extra Credit (Optional)**

Participate in at least 4 hours of volunteer-work on a habitat restoration project or other approved activity, have someone take a picture of you at the event, and write a two to three page paper about your experience. In return, you will receive up to a 1% increase in your overall grade. Your paper should explain what the project was, who sponsored/organized the project, and what the broad goals were for the project. Your paper should also include a reflection on your experience (What did you take away from this experience? How does your volunteer experience relate to this class?). This paper must be turned in by the last class meeting before the final exam. No exceptions will be made regarding the due date. See the “Volunteer Opportunities” link on Canvas for some possible events.

**GRADING**
