

MSL NEWSLETTER

February Monthly Connect

For our February connection we spent the morning at Tinkertopia in Tacoma, WA. Students were challenged to create a Rube Goldberg machine. In short, a Rube Goldberg machine is a contraption that uses a chain reaction to carry out a simple task. It performs a very basic job in a complicated way. Our task was to open a book. Both of our three person teams were successful!! We had a great time while being creative and using our scientific minds!!

Upcoming Event

When: Saturday, March 19, 2022

10:00am-1:00pm
