

Name: Kien Truong

FA: Andrew Fry

Class: TINFO 497 - internship

Company Name: Wizard's Keep Games

Manager: Jason Bassonette

Summary: My internship project is a website for a local business, Wizard's Keep Games, a tabletop game store located in Renton. The website is intended for customers and other visitors to be able to identify what the store is, information about the location and contact, as well as an online storefront to buy certain items and register for events that the store hosts online. As of 2021, around 40% of the store's income comes from their online storefront, but the portal to get there was old and difficult to access, not making it very customer friendly. This project is a real-world experience building out infrastructure for a business.
