

Name: Camden Mergel

Project Title: Puyallup School District Technology Internship

Company: Puyallup School District (EdTech)

Industry Sponsor: Nick O'Neill

Faculty: D.C. Grant

For my summer internship, I worked for the Puyallup School District where I've been employed for the past 6 summers. As a team lead my job was to lead a team of five people to configure over 4,000 devices across 9 schools. I have taking my knowledge from classes so far and applying them to my projects. Some of the skills from the classes I have been using during my internship include hardware, networking, managing tech teams, and system analyst and design. During my internship I created a schedule to meet weekly deadlines, taking inventory of any technology with a barcode, labeling laptops and laptop carts, taking apart technology in classrooms, setting up technology in classrooms, trouble shooting, and handing out devices to students. My experiences as a team lead has taught me how much responsibility comes with the job.
