# The effect of implicit norms on residential interactivity: how do unseen norms in our residential infrastructure influence our interactions, both with the space itself, as well as with those that navigate it?

- Grounded Theory Approach utilizing Field Notes
- Focusing on the form, function, and norms
- Spatial usage of residents and non-residents
- Implicit rules to the space.

- Garbage/Recycling bins
- Moveable format
- Provided bins all look the same
- Overflow is seen as unsightly

- Fences
- Ranging from small (ornamental) to large (privacy)
- Denoting boundaries
- Separation of visibility

- House Facades
- Street facing sections can look like faces
- Watchful eye of homeowners
- Further separation between public and private

- World population increasing
- City/town growth
- International adoption of practices
- Cross-cultural densification
