Mechanical Engineering  
Internship Program

1-10 Credits – Each credit requires 4 hours per week of effort on the project for a 10 week period (e.g., earning 5 credits requires 20 hours of effort on the project for a 10 week period – total of 200 hours).

This course is geared towards ME students that have completed the ME core requirements who would like to receive academic credit for degree-related paid or unpaid work experience.

Objectives:
The Internship program provides students with the opportunity to apply theoretical and conceptual classroom knowledge to practical work experiences, and to gain broad experience in a professional work environment. It provides employers with the opportunity to involve students, eager to employ new skills and methodologies, in select professional design, implementation, and/or research projects. These students could potentially be future employees.

Assessment Methods:
A ME faculty advisor, a professional mentor from a sponsoring organization, and a ME student will form the internship team. Together they develop the project or employment plan. The plan must clearly identify the learning objectives and the program competencies that are further developed through participation in the internship.

The ME student will write a formal report detailing her/his project and her/his individual accomplishments. The report and an evaluation by the faculty advisor and professional mentor will determine the grade for the internship. This report will be a public document.

Students can receive up to a total of 10 academic credits toward their degree for documented degree-related experience. These credits cannot be earned in a single quarter and must be spread over two or more quarters. Each 5 academic credits awarded must be deemed educationally equivalent to be applied as 5 hours of ME elective coursework.

Process for Planning Internship Projects

Step 1: Complete course prerequisites for enrollment in TME 497: Internship in Mechanical Engineering.
   All ME junior-level courses must be completed prior to beginning TME 497.

Step 2: Find and be hired for an internship or degree-related job.
   Each student must be hired for an internship program or a job that is related to their degree field.

Step 3: Identify ME faculty advisor for Internship.
   This ideally should be a faculty member who is familiar with the student, has been her/his professor in an ME course, and who is willing to supervise the academic portion of the internship learning.
Step 4: Complete ME Internship Contract Form and receive signed approval from the faculty advisor and Internship Sponsor(s).

It is advisable to complete this form in consultation with your faculty supervisor to insure that your document will meet all requirements.

Step 5: Present completed ME Internship Contract Form to Director of Industry Partnerships to check for completeness of application and verification of Internship sponsor(s).

The student must submit the completed and signed Internship Contract to the Director of Industry Partnerships to receive registration entry code.

Step 6: Receive ME program approval.

The ME Director or Director of Industry Partners will review all Internship projects to make a final determination of academic merit. Evaluation criteria will be reviewed to ensure they meet program competency requirements.

Step 7: Enroll in TME 497: Internship in ME.

Once program approval is granted, the student receives an entry code to enroll in TME 497.

Step 8: Complete the Course TME 497: Internship in ME.

This course requires students to meet regularly with the faculty advisor to discuss project status, lessons learned, academic models addressed, and other issues associated with the completion of the Internship projects. Students are required to submit a written status report prior to each meeting. This report should clearly describe the status of the project(s) and the deliverables. Group project reports should clearly delineate each group member’s contributions and milestones, as well as summarizing group meetings. It should clearly describe and explain any barriers or slippages in the proposed schedule.

Step 9: Prepare quarterly status report(s) and final report.

Students prepare a quarterly status report and/or final report at the end of each quarter for evaluation & grading by the faculty advisor in consultation with the Internship sponsor. The Internship sponsor should review the quarterly status report and/or final report to insure there is no breach of confidentiality before the report is submitted.

Step 10: Present final project at ME colloquium.

In order to have completed the TME 497 requirements, students present their work at a UWT ME colloquium. Colloquia will be scheduled each quarter as required.

Step 11: Receive final evaluation and grade.

The faculty advisor will evaluate the final project and determine the grade according to the criteria agreed on in the Internship Proposal. The grade will include the quality of the report and the presentation.

NOTE: A copy of the final report must be included in the student’s file. A copy will also be made available for anyone who requests it. It is essentially a public document.
Mechanical Engineering Internship
Contract for TME 497 (1-10 credits)

Administered through the:
Mechanical Engineering Program
1900 Commerce St., CP 133

FACULTY ADVISOR: _____________________________________________________________

Please answer the following questions regarding your internship project. Use attachments when necessary.

1. Clearly describe the benefits of the proposed internship (i.e., What was this internship going to teach you?)

2. Provide a clear, detailed description of the academic merit of the project. Academic merit is defined as ways in which you will further develop your core and concentration competencies. Please list the competencies you will focus on and provide a brief description of how each one will be further developed by your involvement in this project.
The Internship program provides ME students with the opportunity to apply theoretical and conceptual classroom knowledge to practical work experiences, and to gain experience in a professional work environment. Although the ME Program has taken reasonable steps to ensure a positive learning environment with sponsors, it should be understood that some aspects are beyond the direct control of the University. In signing this Internship Contract, the student acknowledges that the University cannot be responsible for the sponsor’s environment and any risks of the sponsor’s environment. In addition I understand my responsibilities as described in the Statement of Agreement attached.

Student Name ________________________________ Signature ________________________________

TME 497 provides students with the opportunity to earn academic credit while working in a professional environment. Students learn by applying classroom theory to work performed in an organization whose function or work product is related to the student’s area of study. We, the undersigned, have read and approved the above proposal and understand the requirements of this proposal per the responsibilities identified in the Statement of Agreement attached. The sponsor understands that the reports submitted by the intern is a public document and may be requested and read by any requesting citizen of the State of Washington. The sponsor does have the right to inspect all intern reports to insure that it does not violate any company confidences. The sponsor also understands that the report must contain sufficient information to evaluate the intern’s work. In addition we all affirm that we support equal opportunity and promote diversity.

I understand that the School of Engineering & Technology at the University of Washington will publish my final thesis/report in hard copy and on its web site.

Student, Faculty Advisor, and Internship Sponsor
Statement of Agreement

1. The Student agrees to:

   ● Perform to the best of her or his ability and to the satisfaction of the internship sponsor(s) those assigned tasks related to the cooperative component of this contract and adhere to all personnel rules.

   ● Perform to the best of her or his ability learning activities negotiated with the faculty advisor as stated in the contract, including communicating with the faculty advisor according to the scheduled course meetings and other scheduled events as indicated in the contract.

   ● Complete all deliverables as described in the contract, present findings at the ME colloquium and prepare a final report. A copy of the final report needs to be turned in to the ME Program Administrator upon completion.

   ● Talk with the internship sponsor, faculty advisor, ME Program Administrator and other program representatives with regard to any changes, revisions, or concerns regarding the project.

   ● Turn in a final assessment of your internship experience including any “lessons learned” and advice for future students.

2. The Faculty agrees to:

   ● Provide instructional support and guidance by communicating regularly with students about their on-site experiences, pertinent readings, theoretical frameworks, and project designs.

   ● Utilize meeting times with the student as an opportunity to develop writing skills by reviewing one or more drafts of the final paper and/or software project.

   ● At the end of each quarter, assign a grade according to the evaluation criteria identified in the Contract. (Note: these criteria are reviewed during the program approval process of the Contract.) Upon completion of the project, provide your final evaluation of the project. Incorporate any feedback received from the sponsor into your final evaluation.

3. The Internship Sponsor agrees to:

   ● Provide a good learning and training environment for the student, keeping routine work such as typing and filing to a minimum.

   ● Evaluate the proposal and make agreements, if applicable, with the student and faculty advisor pertaining to the following: a) any and all intellectual property rights; b) non-disclosure or confidentiality of specific sponsor methods, technologies and/or business strategies; c) time-limitations for non-complete agreements between all parties; and d) acknowledgement of any and all rights to ownership of pre-existing knowledge.

   ● Work directly with the student and make explicit arrangements with the student concerning the overall goals described in this contract, communication with the student, expectations, and records of the student’s hours and performance.

   ● Complete an evaluation of the student’s performance and this Internship process. This evaluation must be returned to the ME Program Administrator before the student can receive credit.

Staff in the ME Program Office will coordinate the internship and provide administrative support services as needed by the student, faculty advisor, and internship sponsor. The faculty advisor will determine the grade after consultation with the ME Internship Administrator, the sponsoring sponsor, and the student. Upon request from the student, faculty advisor, or sponsor, the ME program staff is available to assist in resolving any difficulties that may arise.

This contract may be terminated or amended by the student, faculty advisor, or sponsor at any time upon two weeks written notice, which is received and agreed to by the other parties.
