Project Title: Earned Value Analysis Reporting Tool

Sponsor: D.C. Grant/BCRA

Abstract: Due to the large amount of business and revenue BCRA earns they created internship positions to build a reporting tool show both individual projects and project managers. The outcome will include a product that will show the data in an organized, clear, and user-friendly manner. This product is designed to conduct monthly reports on current projects and their projected outcomes. The team is using Excel, Access and a Deltek database. Also the team is using SQL to create tables in Access and then export that data to Excel for user ease. There have been some inconsistencies in the data, but the team is working through these to issues to develop a viable product for the company.
