**Name:** Charankamal Daliwal  

**Project:** The Wave  

**Faculty Sponsor:** D.C. Grant  

**Abstract:**  

The Wave is a music based website created for Punjabi music where you can find lyrics to your favorite songs, as well as new releases. Punjabi is a state in India where the national language is Punjabi. This will help the community keep up with the latest news. The Wave was created because many listeners like myself don't understand certain words and there aren't websites/apps or user friendly platforms that allow people to keep up and look up music, with accessibility to lyrics. Punjabi music is big in India and also nations close to India and having a platform for their artists was the goal.
