Survey to Faculty Merit Raises
The first draft on 11/18/2013

The Faculty Affairs Committee created principles for merit raises and advised units to develop clear, transparent processes around how merit would be allocated. Now, it is a good time to do some assessment of how well the process worked in units.

During the 2012-2013 academic year, The Executive Council of Faculty Assembly at UW Tacoma charged the Faculty Affairs committee to investigate and report on the state of merit and raise determination in academic units at UW Tacoma and to provide recommendations for them. It is up to individual academic units to develop policies and procedures that are consistent with the Faculty Code. The Committee provided a synopsis of applicable portions of the Faculty Code and sample practices including principles/recommendations to adopt in their units. The Committee recommended that each academic unit develop policies and practices that suit its goals and culture and provided a list of questions and principles that can guide such development at the unit level. To view the complete recommendation document, please see the attached file.
